

It is my request that the FCC not implement any proposal that would lessen Indiana's Telephone Privacy law. This Privacy law has improved my privacy and rest at home. Before registering on the Indiana Attorney General's no-call list, I used to receive 6 to 8 telemarketing calls per night. Some after having gone to bed for the night! Now, I have begun to answer the phone when it rings, like I did before telemarketing was popular.

Indiana's law is important to my family, please do not lessen its' effect.
